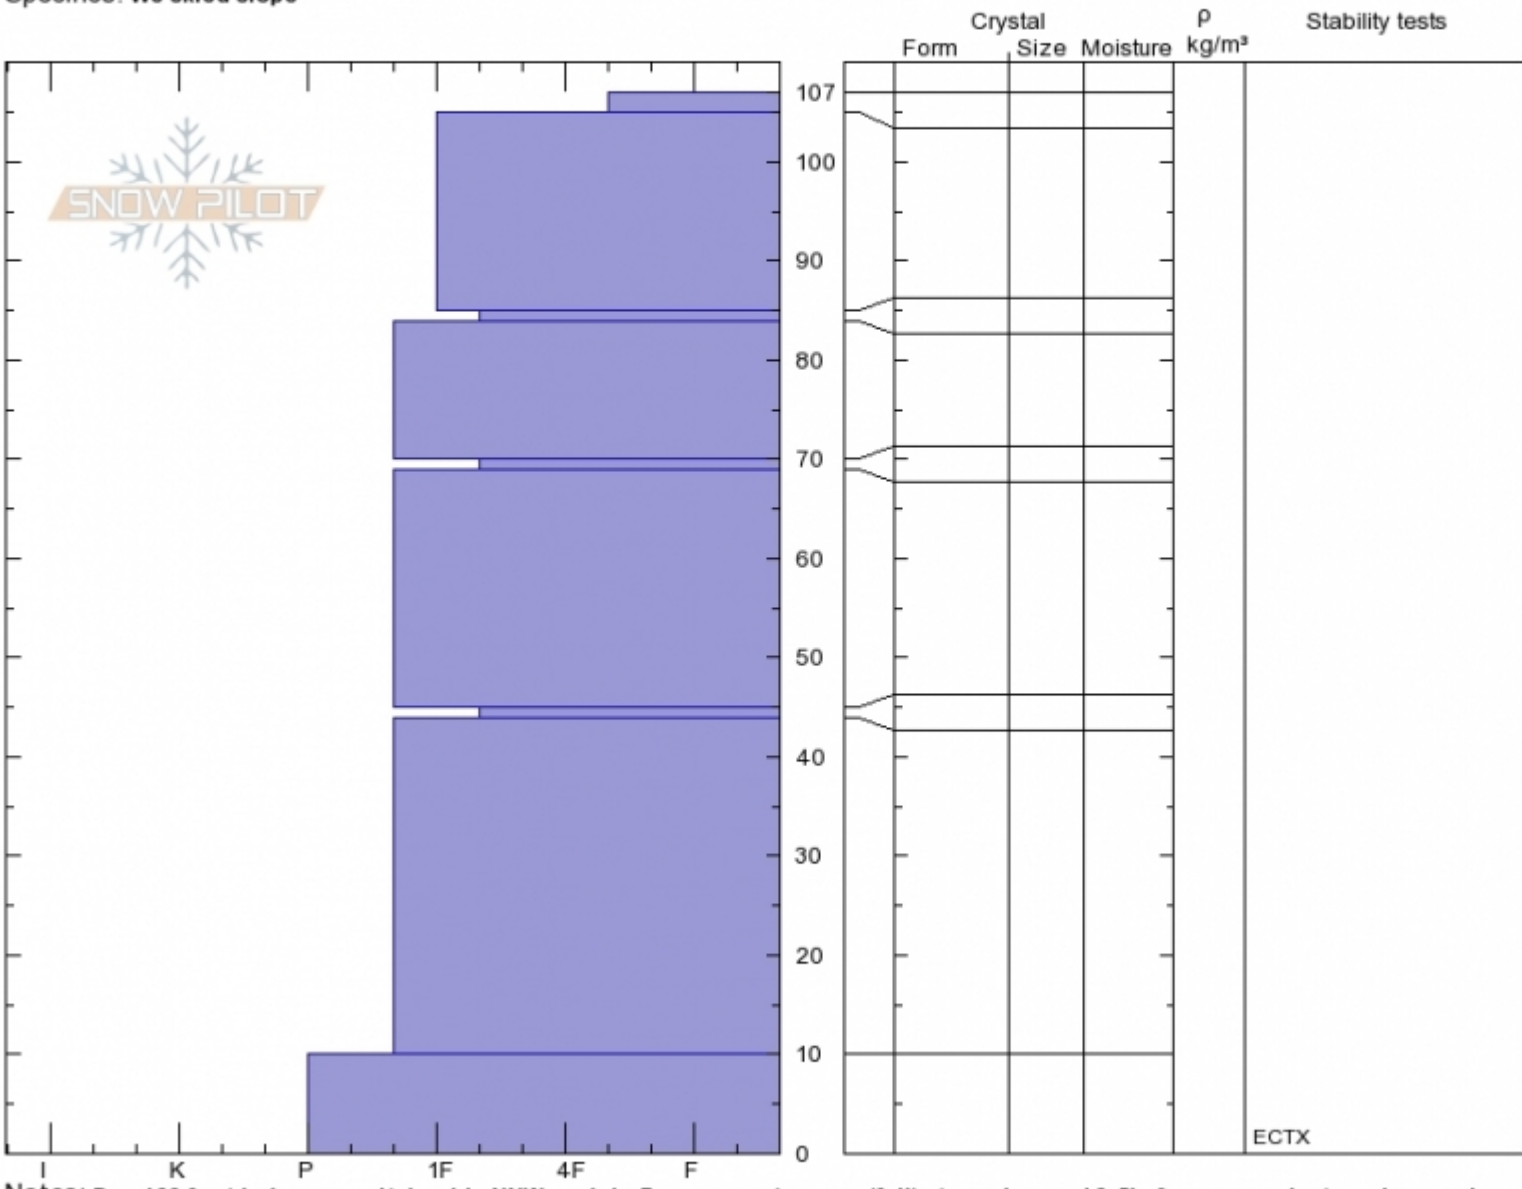
Slope Angle: **32°**
Wind Loading: **previous**

Stability: **Good**
Air Temperature:
Sky Cover: **SCT**
Precipitation: **NO**
Wind: **NE Calm**

HS107
Stability Test Notes

Layer No



Notes: **Dug 100 feet below summit, in wide NNW couloir. Pre-season (summer/fall) storm dropped 3-5' of snow over last week, came in wa strong wind, bonded well. Have observed widespread 10-20cm rain/melt crust on ground that formed at start of storm. This layer and well bonded to warm/moist snow above. No sign of collapse (or shear). Main concern is fresh wind load.**
