

From an observation: "We were up on the ridge off Palace Butte and saw this recent natural released slide. Crown was big in spots. Must have happened sometime over night or in the morning (1/29 or 1/30) perhaps from the recent wind loading. East, southeast facing, on the peak north of MT Bole." Photo: A. Schrier

Advisory Region Northern Gallatin Longitude -110.96W Latitude 45.45N

Avalanche Details: Natural avalanche in wind-loaded snow near Mt Bole, Hyalite
