collapse at Blackmore

Mt Blackmore Northern Gallatin 1/9/2021 Code Latitude 45.44440 Longitude -111.00400 Notes

From email: "Got up to Blackmore way. I didn't like the skin <u>track</u> heading up to N ridge but my partner was a little ahead and should of reeled him back... because the main skinner right now is exposed to much of face. So when caught up we angle lookers right a tidge to gain ridge. Just before the ridge was the disturbing collapse."
