

storm slabs at Bridger

Bridger Bowl

Bridger Range

4/13/2023

Code

SS-N-R1-D1

Elevation

8300

Aspect Range

E, NE, SE, SW, NW

Latitude

45.81560

Longitude

-110.92300

Notes

"Small storm [slab](#) off the steep drift on skier's R/skinner's L side of upper Thunder Road. Also felt some cracking and collapsing when I (briefly) stepped off the skin [track](#) to get to the top of Pierre's Knob."

"skinned up to the ridge and observed 5-9 inches of new and accumulating snow forming into wind drifts that were highly reactive. Multiple remote triggers occurred while traveling N on the ridge, propagating both on W and E faces of the ridge. Both Hidden and Northwest Passage slid with little effort down to an icy [bed surface](#). Debris at bottom of hidden was substantial but great skiing."

Number caught

0

Number buried

0

Avalanche Type

Soft slab avalanche

Trigger

Natural trigger

R size

1

D size

1

Problem Type

New Snow

Slab Thickness

6.0 inches
