

Natural avalanche on Miller Ridge

Miller Ridge

Cooke City

12/11/2023

Code

D2

Aspect

SE

Latitude

45.04230

Longitude

-109.96500

Notes

From email: "Noted one recent large [slab](#) avalanche on a SE [aspect](#) of Miller Ridge. Estimated to be about 100' wide and 1-4' deep. It ran about 1/3 [track](#) or 600' vert. No fresh snow on the debris, so it likely ran at the end of the last snowfall event."

Date is approximate.
