

Eastern Beartooths

Date

Sun, 02/18/2024 - 13:20

Activity

Skiing

Snowboarding

Toured west of Cole Creek outside RLM boundary. Experienced multiple collapses and cracking.

Unsupportable surface with facets at the base of snowpack. Stability tests resulted in multiple ECT with propagation. Dug pits in location with previous wind loading HS=141, not as deep on adjacent aspects.

No natural avalanches observed. See attached snowpilot profile.

Region

Out of Advisory Area

Observer Name

BMG Level 1
