## **Cooke City Observations 02/27**

Date Tue, 02/27/2024 - 15:00 Activity Skiing Snowmobiling

From email: "We didn't see any avalanches on E Henderson or E Sheep with decent vis on the ride in. One large avalanche on a heavily wind loaded slope below a huge <u>cornice</u> north of Scotch Bonnet. That one looked like it broke deeper/in the old snow, about 100' wide. Also saw one <u>wind slab</u> on a small slope north of Long Lake. 14-16" deep, 20' wide, and within the fresh <u>wind slab</u>. "

Region Cooke City Location (from list) COOKE CITY Observer Name Nina Hance
