

Skier triggered slab at Bridger

Date

Thu, 05/02/2024 - 07:45

From email 5/2/24: "Triggered in the virtues this evening. 40' wide, 4-12" deep, failed as a dense, wind-packed [slab](#) on the rain/sun/heat crust underneath the most recent snow. I had marginal visibility but it looked like there were similar small-ish wind pockets that had failed in a few spots. Good skiing up high, fun first day up there."

Region

Bridger Range

Location (from list)

Bridger Bowl

Observer Name

Ben VandenBos
