

Storm slab avalanches at Bridger Bowl

Bridger Bowl

Bridger Range

5/23/2024

Code

SS-AS-R2-D1-I

Elevation

7500

Aspect

NE

Latitude

45.80390

Longitude

-110.92000

Notes

From obs 5/23/24: "Toured to the top of PK during today's storm. Snow was very wet and heavy. We saw no other slides or signs of instability on the way up. Coming down skiers right of flippers, all 3 of us caused small slides and cracking within the new snow. I triggered the largest [slide](#), which was 6-8" deep and 12' wide."

Number of slides

1

Number caught

0

Number buried

0

Avalanche Type

Soft slab avalanche

Trigger

Skier

R size

2
