Shooting cracks in Middle Basin

Middle Basin Northern Madison 12/15/2024 Code Latitude 45.33740 Longitude -111.38100 Notes

When skiing into middle basin, I stopped at the top of a convex roller and had cracks shooting out 50 feet in either direction from what seemed to be a soft <u>slab</u> in the new snow that slid about a foot or so. This was the most major sign of instability from the day. Lots of shooting cracks when skiing and skinning in the new snow.
