Wind: NE Calm

HS163 PF30 Stability Test Notes 116: 2xslab load on2ndPST Layer No 115.5-116

Notes: Prior pit to this lower on slope, at top of steeper meadow had ECTNs at storm interfaces, no propagation, or obvious SH layers. \ obvious until CT, and then ECTP 13 was a bit of a surprise. Shorter PST cut (15/100) was result of placing slab from previous test PST, essentially doubling the load.
